Hiring Manager
SunDrive
Brisbane

Dear Hiring Manager,

I am writing to express my interest in the Associate Software Engineer position at SunDrive Solar Pty Ltd, as advertised. With a strong academic background in computer science and engineering, combined with hands-on experience in software development and machine learning, I am enthusiastic about the opportunity to contribute to SunDrive's mission of revolutionizing renewable energy technology.

Pursuing my Dual Degree in Biological Sciences from the Indian Institute of Technology Madras, I have developed a solid foundation in programming languages such as C++, Python, and SQL, along with experience in working with frameworks like Angular and React Native. My coursework and projects have equipped me with the necessary skills to design and implement software solutions for complex systems, as well as to collaborate effectively within interdisciplinary teams.

During my internships at FN MathLogic Consulting Services, Street Style Store Company, and Supratech Lab, I gained valuable experience in developing machine learning models, conducting data analysis, and implementing software solutions to address real-world challenges. These experiences have honed my problem-solving abilities and provided me with a strong understanding of software development best practices.

What excites me about the opportunity at SunDrive is the chance to apply my skills and expertise to contribute to the development of automated solutions for solar manufacturing systems. I am particularly drawn to the opportunity to work with cutting-edge technologies and collaborate with a team of experts in the renewable energy industry.

Furthermore, I am impressed by SunDrive's commitment to employee well-being and development, as evidenced by the comprehensive benefits package and emphasis on learning and growth opportunities. I am eager to be part of a team that values continuous improvement and innovation.

Thank you for considering my application. I am excited about the possibility of contributing to SunDrive's mission and would welcome the opportunity to discuss how my background and skills align with the needs of your team.

Warm regards,

Harsh Sagar
