Hiring Manager  
Meesho  
Bangalore  
Karnataka

Dear Hiring Manager,

I am writing to express my interest in the Software Development Engineer I (Data) position at Meesho, as advertised. With a strong academic background in Biological Sciences from the prestigious Indian Institute of Technology, Madras, coupled with hands-on experience in data structures and algorithms and machine learning gained through internships and research projects, I believe I possess the skills and enthusiasm necessary to contribute effectively to your dynamic team.

During my internship at FN MathLogic Consulting Services, I developed a Conversational Question Answering System using Large Language Models (LLMs), achieving a commendable 60% ROUGE SCORE on Microsoft DialoGPT LLM. Additionally, at Street Style Store Company, I worked on improving user experience by classifying conversations between users and agents, achieving a 96.4% accuracy using SVM models. These experiences have honed my ability to seamlessly convert designs into code, a skill vital for the role at Meesho.

I am particularly drawn to Meesho's commitment to innovation, inclusivity, and accessibility in e-commerce. The opportunity to work with a team that values continuous learning and growth while making a tangible impact excites me. I am confident that my blend of technical expertise, adaptability, and passion for creating impactful solutions aligns well with the goals of Meesho.

Thank you for considering my application. I am excited about the possibility of contributing to the success of Meesho and am looking forward to the opportunity to discuss how my background, skills, and enthusiasm can benefit your team further.

Warm regards,  
Harsh Sagar
