Hiring Manager
Ericsson
Noida, Uttar Pradesh, India

Dear Hiring Manager,

I am writing to express my interest in the Software Developer position at Ericsson, as advertised. With a solid educational foundation in Biological Sciences from the Indian Institute of Technology, Madras, coupled with hands-on experience in software development and machine learning, I am excited about the opportunity to contribute to your team.

During my internship with FN MathLogic Consulting Services, I developed a Conversational Question Answering System using Large Language Models, which honed my skills in Node.js, FastAPI, and the use of cloud services. This experience, along with my role in implementing CI/CD pipelines and managing AWS infrastructure at Street Style Store, aligns well with the requirements for your position, which emphasizes the need for expertise in cloud technologies, CI/CD, and backend development.

At Ericsson, I am particularly drawn to the innovative culture and the focus on developing solutions that lead the industry in terms of technology and sustainability. I am eager to bring my background in software development and my proactive approach to your esteemed company, contributing to impactful projects and further enhancing the customer solutions you provide.

I look forward to the possibility of discussing this exciting opportunity with you. Thank you for considering my application. I am hopeful to contribute to and grow with Ericsson, leveraging my skills to deliver high-quality software solutions.

Warm regards,

Harsh Sagar
