Hiring Manager  
Cornerstone  
India

Dear Hiring Manager,

I am writing to express my interest in the Junior Engineer, Quality position at Cornerstone OnDemand, Inc., as advertised. With a strong educational background in Biological Sciences and a proven track record in software development and machine learning, I am confident in my ability to contribute effectively to your team.

My academic journey at the Indian Institute of Technology Madras has equipped me with a robust foundation in both theoretical knowledge and practical application. My dual degree in Biological Sciences, coupled with relevant coursework such as Data Structures & Algorithms for Biology and Biostatistics, has provided me with a unique interdisciplinary perspective that I believe will be valuable in understanding the complexities of software quality engineering.

During my tenure as a ML Engineer Intern at FN MathLogic Consulting Services, I gained hands-on experience in developing conversational question answering systems using Large Language Models (LLMs) and document parsing for question answering. These experiences honed my skills in software development, including frontend interaction, backend implementation, and utilization of various frameworks and platforms.

Additionally, my research experiences, including a project on Machine Learning for Milk Foam Analysis at IIT Varanasi and ongoing work on evaluating ML models for chest X-ray analysis at IIT Madras, have further enhanced my analytical and problem-solving abilities. These experiences have equipped me with the skills necessary to approach quality engineering with a meticulous and detail-oriented mindset.

I am particularly drawn to Cornerstone OnDemand's commitment to empowering people and fostering an inclusive and innovative culture. I am eager to contribute to your mission of providing organizations with the tools and expertise needed to realize the potential of their people.

Enclosed is my resume, which provides additional details about my academic and professional background. I am excited about the opportunity to bring my unique skill set and passion for quality engineering to your team at Cornerstone OnDemand, Inc. Thank you for considering my application. I look forward to the possibility of discussing how my skills and experiences align with your needs further.

Warm regards,  
Harsh Sagar
