Hiring Manager  
GitLab

Dear Hiring Manager,

I am writing to express my interest in the Backend Engineer, AI Powered: AI Framework position at GitLab, as advertised. With a solid background in backend development, proficiency in Ruby on Rails and Python, and a keen interest in AI technologies, I am excited about the opportunity to contribute to shaping the future of AI at GitLab.

In my previous roles, I have developed features and improvements to products in a secure, well-tested, and performant manner. I am skilled in collaborating with cross-functional teams, advocating for product quality and performance enhancements, and solving technical problems of moderate scope and complexity. My experience with distributed systems, cloud platforms like AWS, GCP, and Azure, as well as CI/CD pipelines, aligns well with the requirements of this role.

What particularly draws me to this opportunity is the chance to work on the core of GitLab – the AI Framework. I am eager to leverage my knowledge of AI technologies and contribute to facilitating the integration of AI capabilities throughout GitLab. I am self-motivated, adaptable to change, and thrive in a highly agile, remote work environment.

I am impressed by GitLab's commitment to fostering a culture of inclusion and diversity, as well as the emphasis on employee well-being and professional growth. I am confident that my skills, passion for technology, and alignment with GitLab's values make me a strong candidate for this role.

Thank you for considering my application. I am excited about the opportunity to potentially join the GitLab team and contribute to its continued success. I look forward to the possibility of discussing how my background, skills, and experiences align with the needs of your team.

Warm regards,  
Harsh Sagar
