Hiring Manager
Myntra
India

Dear Hiring Manager,

I am writing to express my interest in the Data Scientist position at Myntra. With a strong educational background in Biological Sciences from the prestigious Indian Institute of Technology Madras and hands-on experience in data science, machine learning, and research, I am excited about the opportunity to contribute to your team.

During my tenure as a Data Science Intern at FN MathLogic Consulting Services, I worked on developing a Conversational Question Answering System using Large Language Models (LLMs), exploring various model fine-tuning methods on real-world data. Additionally, my internship at Street Style Store Company involved classification tasks to enhance user experience, while my stint at Supratech Lab focused on identifying crucial biomarker genes for improving IVF treatments.

My research experience, particularly in machine learning for diverse applications such as milk foam analysis done during internship at IIT Varanasi got published as research paper in Food Analytical Methods journal of Springer publications. Moreover, my coursework and projects have honed my skills in data analysis, statistical modeling, and algorithm development, making me well-prepared to tackle the challenges of serving millions of requests per second at sub-second latency.

I am particularly drawn to Myntra's dynamic environment and its commitment to leveraging cutting-edge technology, including GenAI models and state-of-the-art machine learning techniques. I am eager to be part of a team that not only delivers impactful solutions but also contributes to research literature with peer-reviewed publications.

I am confident that my blend of academic knowledge, practical experience, and passion for data science make me a strong fit for the Data Scientist role at Myntra. I am excited about the opportunity to bring my skills and enthusiasm to your team and contribute to the success of Myntra's data science initiatives.

Thank you for considering my application. I look forward to the possibility of discussing how I can contribute to the continued success of Myntra.

Warm regards,
Harsh Sagar
